

Investment Strategy

The Luxon Global 30/70 Model seeks to grow and protect invested capital with a conservative allocation. The Model targets a 30% allocation to global equities and a 70% allocation to global fixed income. The Model is not tactical and will maintain market exposure comparable to its primary benchmark blend: 30% MSCI All Country World Index, 70% Bloomberg Barclay's Global Aggregate Bond Index.

Luxon Global Models are proprietary products of Luxon Asset Management, LLC, Luxon Asset Management is a subsidiary of Luxon Financial Holdings, LLC.

Models included in this document have been independently verified by ACA Performance Services, LLC for the period of 1/1/15 – 12/31/17. Independent Performance Certification Reports for each Model are available upon request by contacting info@luxonglobal.com. Performance shown after 12/31/17, though believed to be accurate, has not been independently verified. Luxon plans to have ongoing performance audits completed on these models annually.

Luxon Global 30/70 Model: The Luxon Global 30/70 Model seeks to generate income while maintaining some modest growth in investment capital. The Model's target allocations provide investors with a 30% allocation to equities and 70% allocation to fixed income investments. The Long-Term Benchmark is a blended benchmark of 30% MSCI ACWI (Net) Index, and 70% Barclays Global Aggregate Bond Index, blended quarterly. The Variable Blended Benchmark (the Blended Benchmark) is shown as additional information. As of 1/1/2019 it had the following weightings: 7% MSCI AWCI ex USA (Net) Index, 23% MSCI USA Index, 19% Barclays Global Aggregate ex USD Bond Index, and 51% Barclays USA Intermediate Aggregate Bond Index, rebalanced quarterly.

Past performance does not guarantee or indicate future results. All investment strategies have the potential for profit or loss. Any performance information included herein represents the performance achieved by Luxon Asset Management as a discretionary investment manager with trade implementation responsibility for the accounts included in the performance composite. The performance shown does not reflect the performance of Model-Based Program accounts managed by a Sponsor utilizing Luxon's non-discretionary investment recommendations. In Model-Based Programs, although it is generally contemplated that the Sponsor will implement Luxon's investment recommendations in Program accounts, the performance of such accounts may differ from the performance shown for a variety of reasons, including but not limited to: the Sponsor, and not Luxon, is responsible for implementing trades in the accounts; differences in market conditions; client-imposed investment restrictions; the timing of client investments and withdrawals; fees payable by Model-Based Program accounts; and/or other factors.

Composite and benchmark/index performance results reflect realized and unrealized appreciation and the reinvestment of dividends, interest, and/or capital gains. Taxes have not been deducted. Gross composite returns do not reflect actual performance because they do not reflect the deduction of any fees or expenses. Certain performance figures do not reflect the deduction of investment advisory fees (please refer to Part 2 of Luxon Asset Management's Form ADV) in the case of both separate investment accounts and mutual funds; but they do reflect commissions, other expenses (except custody), and reinvestment of earnings. Such fees that a client may incur in the management of their investment advisory account may reduce the client's return. The "net of fees" performance figures reflect the deduction of investment advisory, custodial and trading fees, but does not include any advisor fees. All periods longer than one year are annualized. Net composite returns reflect the deduction of an annual fee of 0.25%, typically deducted quarterly. Due to the compounding effect of these fees, annual net composite returns may be lower than stated gross returns, less stated annual fee. Index returns do not reflect transaction costs or the deduction of fees and it is not possible to invest directly in an index. This material has been created by Luxon Asset Management and the information included herein has not been verified by your program sponsor and may differ from information provided by your program sponsor.

Luxon Asset Management ("Luxon") acts as a discretionary investment manager or non-discretionary model provider in a variety of separately managed account or wrap fee programs (each, an "SMA Program") sponsored either by Luxon or a third-party investment advisor, broker-dealer or other financial services firm (a "Sponsor"). When acting as a discretionary investment manager, Luxon is responsible for implementing trades in SMA Program accounts. When acting as a non-discretionary model provider, Luxon's responsibility is limited to providing non-discretionary investment recommendations (in the form of model portfolios) to the SMA Program Sponsor, and the Sponsor may utilize such recommendations in connection with its management of SMA Program accounts. In such "model-based" SMA Programs ("Model-Based Programs"), it is the Sponsor, and not Luxon, which serves as the investment manager to, and has trade implementation responsibility for, the Model-Based Program accounts.
